

Social Narrative

Going to the Museum of Life and Science

I am going to the Museum of Life and Science.
There are many fun things to do at the museum!

I can learn and play at indoor exhibits about weather, math, and health.

There are also indoor exhibits about sounds, patterns, and construction.

I can see many animals, too!
There are animals like owls, lemurs, and turtles.

And there are animals in the Farmyard,
like donkeys, pigs, and cattle.

There are many places to play outside. I can climb, go down slides, and dig in sand.

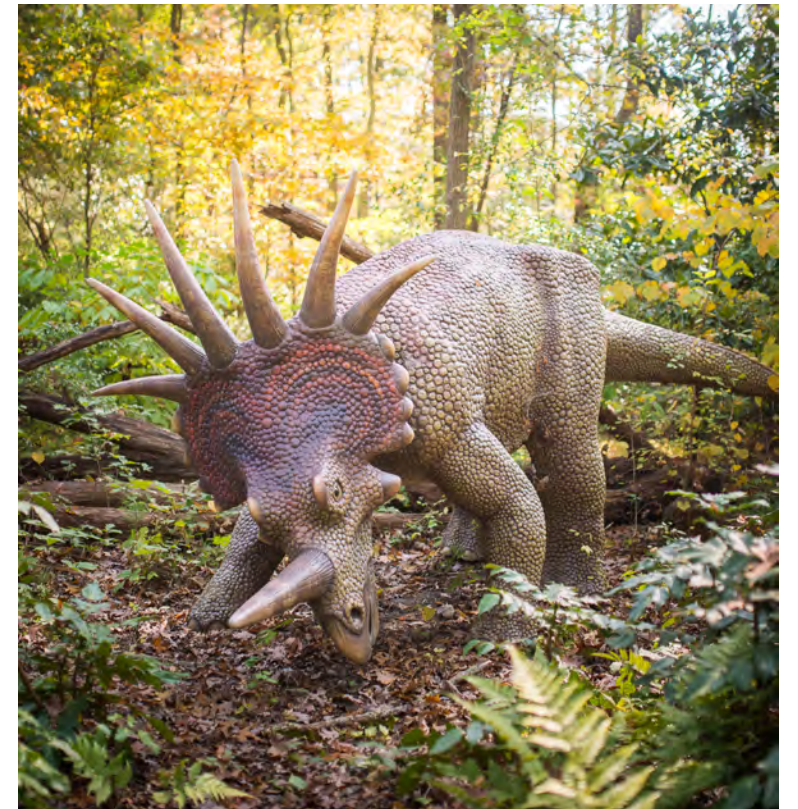

A butterfly house has butterflies and colorful plants.
The Insectarium is nearby and it has many different insects.

A train takes some people on a ride.
I can wave to the people on the train as they go by.

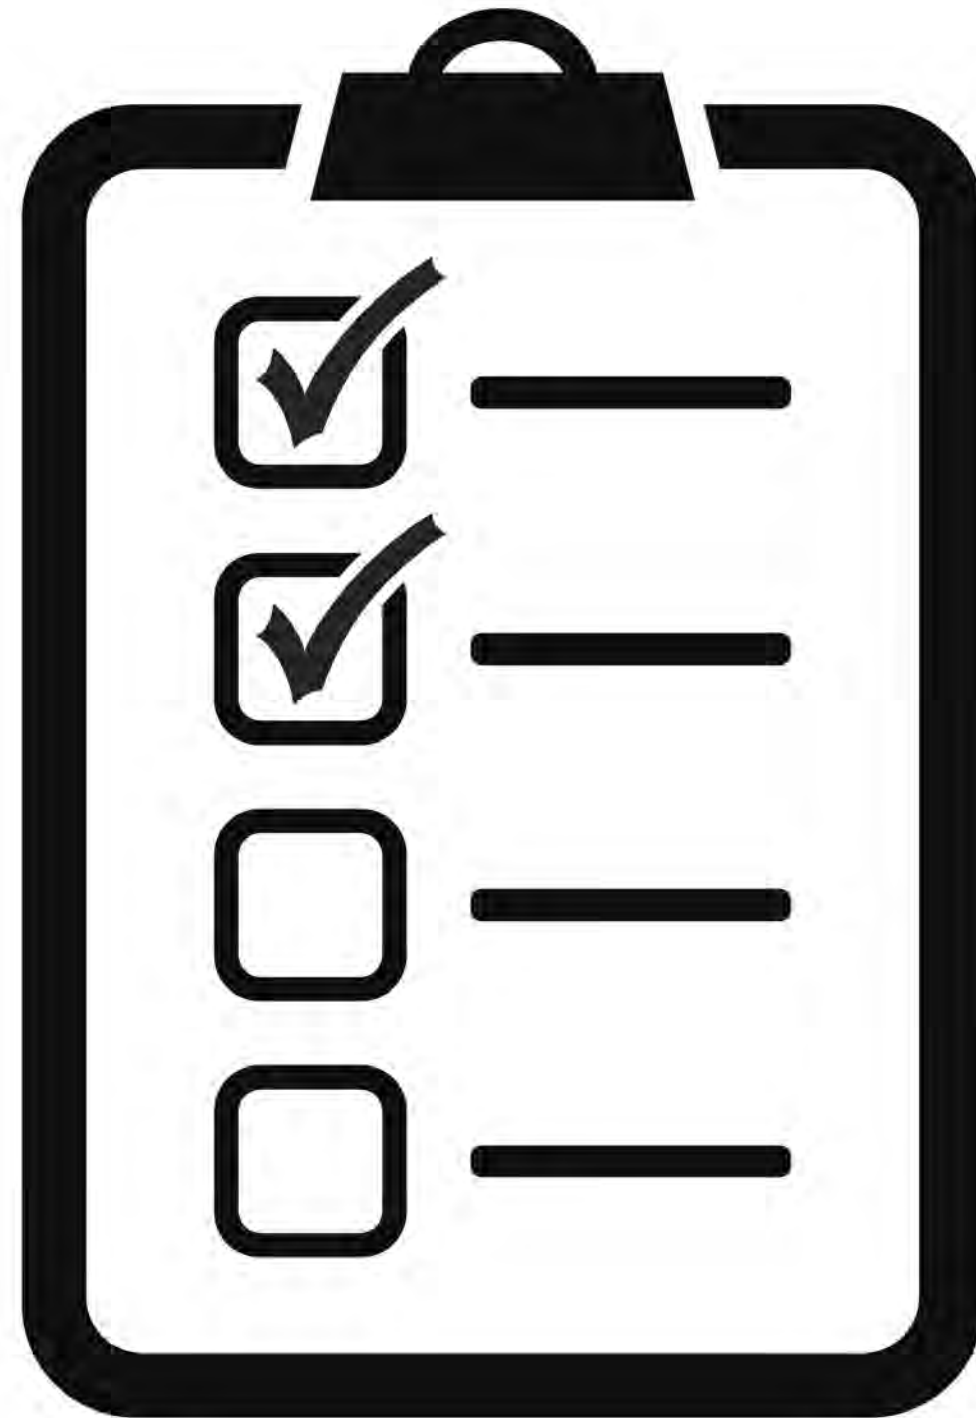

I can ride the train if there are tickets available.

I can walk along the dinosaur trail to discover dinosaurs and dig for fossils.

When I get to the museum, my parents / teacher
will help me buy a ticket.

They will give me a schedule that shows me exactly what we will do at the museum.

I will try to follow my schedule. I will get to see many things at the museum, and it will be a lot of fun!
