

Invent the Night Gala: Sponsorship Opportunities

Event: Join the Museum of Life and Science on May 5, 2023 from 6-11pm for an evening filled with the “Magic of Science” at our Invent the Night gala. We will celebrate our sponsors and supporters with drinks, dancing, music, a silent auction, a live auction, food, and more.

About the Museum: The Museum of Life and Science is a place for learners to develop, build, and practice their scientific and critical thinking skills. The Museum provides materials, spaces, and experiences that encourage active investigation, curiosity, and inquiry. We create experiences to promote a sustained, ongoing journey of critical thinking and discovery. We strive to create a place of lifelong learning where people of all ages embrace science as a way of knowing about themselves, their community, and their world.
